**Re Item V**

**Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The invention refers to a product containerisation system for skin packing that allows a good protection against mechanical damage and easy dispensing of the product by the user. A product containerisation system according to the preamble of claim 1, is, for example, known from document US-A-4411364.

According to the invention the polymeric film provides the primary packaging of the product, is water soluble and arranged such that it can shear by twisting the product in a precise way.

The special arrangement and selection of the polymeric film according to the features of claim 1 makes the subject-matter of this claim neither known from, nor rendered obvious by, the available prior art.

Therefore the subject-matter of claim 1 is considered new and involving an inventive step (Article 33(2) and 33 (3) PCT). Consequently, the subject-matter of each dependent claims 2 to 10 fulfils as well the requirements of novelty and inventive step.

Furthermore, claims 1 to 10 are considered as susceptible of industrial application.
